

BARN PROJECT 2023

The Start: A last look at the Pine Trees. Snow fell during the April 8 meeting, coating the trees for a last time. Mike Bachelder dropped many of the smaller trees the next week. The big ones next.

April 19, 2023: New Barn Project

Mike Bachelder and Greg Ruppel dropped 12 more trees and stacked 29 logs.

Mike cut the smaller ones down last week. Great pics Greg.

The propane tank will be relocated next to the other one by the fuel tanks and the stumps will be removed on the April 29 work session.

Mike brought his tractor with forks to move the big logs.

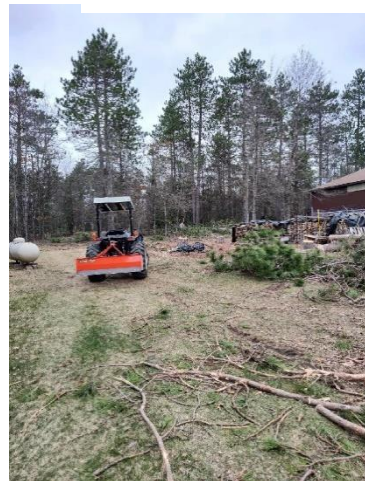

Mike Bachelder and Greg Ruppel saved the club \$1000s by taking down the trees.

Stumps will be dug out by Corey and the brush will be chipped and spread on the trail to the power line.

Mike piled the Logs with his tractor for the buyer to pick up.

This view is from the Club camera.
