

OCTOBER 2025

The final push to clear the storm damage east of M33.

October 3rd..only a 3 man crew, but we finished trail 6 from the warming shanty to the Al-Can Hwy...a couple of ORV riders helped us for an hour..so trail 6 is in good shape from M-33 to the Al-Can Hwy...need help tomorrow. We are working on Doll road trail from Heath Road north to the Al-Can Hwy. It is really bad..long hot day,(82 degrees)but everyone went home safe..

Carl spent MANY days helping John on the trail.

SATURDAY OCTOBER 4th..
OGEMAW HILLS SNOWMOBILE
CREW...brush clearing on Doll
road..Was a good long
hard,hot day...

Several members worked on the east trail after the meeting Saturday west of South Branch.

Kevin Sessink and Tim Leslie worked Saturday too.

Doug and Debbie Roggenbuck helped out.

Don Perry, Steve Johnson and Greg Ruppel started the time-consuming job of making sure our trails have all the signs necessary. We have to get this done before the Snowmobile Trails can be opened December 1.

Steve and Mike spent the day clearing trees on Trail 643 near Doll Rd. Some logs had to be dragged off the trail

It is a big job getting the leaf blower hooked up to the 7410 so it can clear the leaves before we grade.

A few weeks back the Club pickup truck died on the trail and we had to decide if it was time to retire it. We decided to make some repairs to it and use it as long as we can.

However, we also decided to get a newer truck to take over most of the trail work. We purchased a replacement white 2017 Ford F250 truck. Greg and Christie picked it up in southern Ohio and brought it to its new parking spot.

A big thank you to Chris Fraser for installing the new sign box
